

SysTools Corporate Overview

About Us

SysTools is a premier technology company specializing in data recovery, digital forensics, cloud backup, and cutting-edge software solutions. Established with the goal of providing robust tools to enterprises and individuals, we have grown into a globally recognized brand. Our team of dedicated professionals—spanning developers, security experts, and support engineers—works tirelessly to ensure data integrity and seamless business continuity for our users worldwide. With a deep commitment to innovation, we continuously evolve our product offerings to meet the demands of an ever-changing digital landscape.

Mission & Vision

Mission

Our mission is to simplify technology for businesses by delivering secure, innovative, and reliable software solutions that protect critical data and streamline complex digital operations. We strive to empower our clients by making enterprise-grade data management accessible to organizations of all sizes.

Vision

We envision a secure digital landscape where organizations can operate without the fear of data loss or security breaches. By continuously pushing the boundaries of technology, we aim to be the definitive global leader in data recovery, digital forensics, and intelligent automation.

Quarter	Revenue (Millions)	YoY Growth	EBITDA Margin
Q4 2025	\$18.2M	+25%	28%

What We Do

SysTools provides a comprehensive suite of digital solutions designed to meet modern enterprise challenges. Our core competencies include:

- **Data Recovery:** Advanced software algorithms to recover lost, corrupted, or deleted data from various storage mediums and file formats.
- **Digital Forensics:** Specialized tools utilized by law enforcement and corporate investigators for cybercrime analysis, email tracking, and secure evidence collection.
- **Cloud Backup & Migration:** Seamless transition and secure backup services for platforms like Microsoft 365, Google Workspace, and enterprise servers.
- **GenAI & Automation:** Intelligent automation, bespoke machine learning models, and workflow orchestrations to accelerate business processes and technical support.

Key Clients

We are proud to serve a diverse portfolio of clients across various industries, providing them with secure and scalable solutions. *(Illustrative list)*

- **Acme Global Corp:** Partnered for enterprise-wide cloud migration and data security infrastructure.
- **Vertex Financial Services:** Utilizing our digital forensics tools for internal compliance auditing and risk management.
- **Nexus Health Systems:** Implementing encrypted data backup protocols to ensure patient data sovereignty and seamless system recovery.
- **AeroTech Industries:** GenAI-driven workflow optimization, technical support automation, and predictive maintenance tracking.

Refund Policy

At SysTools, customer satisfaction is our top priority. We stand by the quality of our software with the following refund guidelines:

- **30-Day Money-Back Guarantee:** Customers may request a full refund within 30 days of purchase if the software fails to perform its intended core functions as described in our documentation.
- **Evaluation First:** We highly recommend utilizing the free demo versions available for all our products prior to making a purchase to ensure compatibility and suitability for your specific needs.
- **Non-Refundable Circumstances:** Refunds are not granted for mere changes of mind after purchase, if the user lacks the necessary hardware/software environment, or if a data recovery task fails due to severe physical drive damage.
- **Processing Time:** Approved refunds are processed back to the original payment method within 5-7 business days.
